

GABOR HORVATH

SECURITY SYSTEMS ENGINEER

District 3, 1037 Budapest, Hungary | +36 30 900 2099 | horvath.gabor@email.com | Born: 14 May | [LinkedIn](#)

PROFILE

Security systems engineer with 25 years of experience and a domestic and international background in the design, development, and operation of integrated security systems, as well as the technical management of related projects. I have been responsible for coordinating complex projects, operating systems, managing partner relations, and preparing technical documentation for government institutions and diplomatic missions in EU and NATO environments.

Throughout my career, I have been responsible for operating a video surveillance system with over 700 camera endpoints and an access control system with over 800 points, along with the supporting security IT network - applying a systems-oriented approach, precision, and results-driven problem solving. I hold the highest-level national security clearance, valid until 2028, authorizing me to handle classified national, EU, and NATO information.

I am currently investing significant effort in exploring the potential applications of generative AI, both in personal and corporate contexts, to stay at the forefront of technological innovation in my field.

PROFESSIONAL EXPERIENCE

Security Systems Engineer | Jun 2024 - Sept 2026

Media Services and Support Trust Fund (MTVA), Budapest

- Coordinated the full-scope operation of security systems and the security IT network, ensuring high availability and uninterrupted service.
- Led the technical preparation and delivery of high-value security system development projects.
- Supervised the work of subcontractors, ensuring high technical standards and fulfillment of contractual obligations.
- Prepared technical specifications, managed procurement preparation, and evaluated bids from a professional standpoint.
- Produced and maintained up-to-date technical and operational documentation and records.

Security Systems Engineer | Nov 2023 - May 2024

Apache Design Ltd., Budapest

- Designed and reviewed plans for major construction projects from a security and IT perspective.
- Performed technical supervision duties, ensuring high-quality execution and adherence to deadlines.
- Integrated low-voltage systems, performed commissioning, and optimized existing systems.
- Provided technical support to investors and specialist designers.

Regional Security Systems Engineer | Aug 2018 - Oct 2023

Ministry of Foreign Affairs and Trade, Brussels

- Operated and supervised the security systems of the diplomatic missions in Brussels, The Hague, and Luxembourg, as well as the NATO/EU representations.
- Designed, installed, and maintained security systems and prepared the related technical documentation.
- Coordinated international projects and liaised daily with the European Council on personnel and IT security matters.
- Served as system security supervisor for classified communication channels.
- Acted as designated fire safety and occupational safety officer.

Security Systems Engineer | Jun 2013 - Jul 2018

Ministry of Foreign Affairs and Trade, Budapest

- Operated the security systems of Hungary's diplomatic missions.
- Designed security systems in AutoCAD for the opening, relocation, or expansion of diplomatic missions.
- Collaborated with specialist designers.
- Prepared bills of materials and technical packages for installations and arranged delivery of equipment to the missions.
- Installed, configured, and commissioned the designed systems on site, and trained diplomatic staff in their use.
- Participated in the technical coordination and supervision of local installation works.
- Trained posted staff in system operation prior to the start of their foreign assignments.
- Prepared as-built documentation.
- Provided remote support for system troubleshooting and took part in on-site fault repair when required.

Security Systems Engineer | Jun 2011 - Jun 2013

Pestor Ltd., Budapest

- Designed, installed, and maintained security systems.
- *In parallel, from Jun 2011 to Jun 2013, I also ran my own company (Perfekt Zona Ltd.) as owner.*

Managing Director, Owner | May 2008 - Jun 2013

Perfekt Zona Ltd., Sarbogard

- Founded and managed the company: design and installation of security systems and their connection to remote monitoring stations.
- Coordinated installation works and managed the entire business operation, including invoicing.

Security Systems Engineer | Jan 2004 - May 2008

Jozsef Horvath Sole Proprietorship, Sarbogard

- Installed, commissioned, and maintained security systems.
